

Logan King

Bismarck, ND · 701-955-0732 · logan.king04@icloud.com · [linkedin.com/in/loganking](https://www.linkedin.com/in/loganking)

Professional Summary

Cybersecurity professional with 2 years of SOC experience at MDU Resources, specializing in incident response, threat hunting, and security administration. Proven ability to monitor, investigate, and remediate security incidents across enterprise Windows and Linux environments. Hands-on pentester with a self-built BlackArch machine and competitive CTF/NCL experience (Top 15 Team / Top 750 Individual — Spring 2024). Strong communicator skilled at converting technical findings into actionable remediation and policy improvements.

Technical Skills

- Palo Alto - XSOAR and XSIAM: SOC automation, incident orchestration, SIEM operations
- Threat Hunting & Forensics: YARA, Volatility, Autopsy/FTK, Wireshark
- Pentesting Tools: BlackArch, Metasploit, Burp Suite, sqlmap, Hydra, John/Hashcat, Nmap
- Security Admin: Palo Alto, iptables, Suricata/Snort, Nessus
- Scripting: Python, Bash, PowerShell, Regex, SPL (Splunk)
- OS/Networking: Arch/BlackArch, Ubuntu, Windows Server, AD, TCP/IP, DNS, DHCP
- Methodologies: MITRE ATT&CK, NIST CSF, NIST SP 800-61

Professional Experience

Security Analyst — Security Operations Center (SOC)
MDU Resources | Bismarck, ND | 2023 – Present

- Investigated and responded to SIEM/EDR alerts: phishing, credential abuse, lateral movement, malware.
- Led containment and recovery: host isolation, forensic artifact collection, persistence removal.
- Conducted proactive threat hunts using log correlation and threat intelligence.
- Tuned detections and reduced false positives by ~30% while increasing true positive accuracy.
- Partnered with IT for remediation and post-incident hardening.
- Produced reports and metrics for leadership, including MTTR and incident breakdown.

Threat Intel Analyst

State of North Dakota | Bismarck, ND | January 2026 – Present

- Conduct intelligence-driven threat analysis and monitoring for state infrastructure and enterprise systems.
- Research indicators of compromise (IOCs), emerging threat actors, and adversary TTPs aligned with MITRE ATT&CK.
- Support incident investigations through threat intelligence enrichment and reporting.

Key Projects & Achievements

- Homemade Pentesting Machine (BlackArch): Built a dedicated BlackArch penetration-testing workstation with encrypted storage and automated tool pipelines. Used for red-team practice and CTF competitions.
- National Cyber League (NCL) — Spring 2024: Team: Top 15 nationally. Individual: Top 750 out of 8,000+ competitors. Focus areas: exploitation, forensics, cryptography, traffic analysis, reverse engineering.

- Threat Hunting Playbook Development: Authored a modular threat-hunting playbook aligned with MITRE ATT&CK.; Created Splunk dashboards to detect suspicious PowerShell, logins, and beaconing.

Education

B.S. in Cybersecurity
Bismarck State College — Bismarck, ND
Completed: May 2026

Additional Information

- Community: Cyber defense club participant; mentor for NCL/CTF team members.
- Availability: Open to SOC Analyst, Incident Responder, or Threat Hunter roles (onsite, hybrid, or remote).
