

LOGAN KING

Bismarck, ND · 701-955-0732 · logan.king04@icloud.com · [linkedin.com/in/logan-king-16862a28b](https://www.linkedin.com/in/logan-king-16862a28b)

PROFESSIONAL SUMMARY

Cybersecurity professional with 3+ years of hands-on experience spanning SOC operations and state-government threat intelligence, specializing in incident response, threat hunting, and security automation across enterprise Windows and Linux environments. Skilled in triaging SIEM/EDR alerts, orchestrating response workflows in Palo Alto XSOAR/XSIAM, and mapping adversary TTPs to MITRE ATT&CK and NIST SP 800-61 to drive faster containment and recovery. Offensive-security background includes a self-built BlackArch pentesting workstation and competitive CTF experience (NCL Spring 2026: Top 15 Team, Top 750 Individual of 8,000+). BAS in Cybersecurity & Information Technology plus five academic certificates in offensive/defensive security, secure programming, and modern computing. Strong communicator who translates technical findings into actionable remediation and policy improvements for both technical teams and leadership.

CERTIFICATIONS & ACADEMIC CREDENTIALS

- **Certificate, Offensive & Defensive Security** — Bismarck State College, 2026
- **Certificate, Secure Programming** — Bismarck State College, 2026
- **Certificate, Modern Computing Technologies** — Bismarck State College, 2026
- **Certificate, Security & Hacking** — Bismarck State College, 2025
- **Certificate, Computer Networking** — Bismarck State College, 2025

TECHNICAL SKILLS

- **SOC / SIEM / SOAR:** Palo Alto XSOAR & XSIAM, Splunk (SPL), incident orchestration, alert triage, detection tuning
- **Threat Hunting & Digital Forensics:** YARA, Volatility, Autopsy/FTK, Wireshark, log correlation, IOC analysis, mobile forensics
- **Offensive Security / Pentesting:** BlackArch, Metasploit, Burp Suite, sqlmap, Hydra, John the Ripper/Hashcat, Nmap
- **Security Administration & Hardening:** Palo Alto NGFW, iptables, Suricata/Snort, Nessus, Active Directory hardening, web app & database security
- **Cloud & Infrastructure:** cloud computing fundamentals, data-center virtualization, disaster recovery & incident response planning
- **Scripting & Automation:** Python, Bash, PowerShell, Regex, SQL, SPL (Splunk)
- **Systems & Networking:** Arch/BlackArch Linux, Ubuntu, Windows Server, Active Directory, TCP/IP, DNS, DHCP
- **Frameworks & Methodologies:** MITRE ATT&CK, NIST CSF, NIST SP 800-61, incident response lifecycle

PROFESSIONAL EXPERIENCE

Security Analyst — Security Operations Center (SOC)

March 2023 – December 2025

MDU Resources | Bismarck, ND

- Triage and investigate SIEM/EDR alerts across enterprise Windows and Linux environments — phishing, credential abuse, lateral movement, and malware — mapping adversary behavior to MITRE ATT&CK.
- Lead containment and recovery for confirmed incidents: host isolation, forensic artifact collection, and persistence removal, restoring affected systems to a verified-secure state.
- Conduct proactive threat hunts by correlating logs and threat intelligence to surface activity that automated detections miss.
- Tuned SIEM/SOAR detection logic in Palo Alto XSOAR, cutting false positives by ~30% while improving true-positive accuracy and analyst throughput.
- Partner with IT operations on remediation and post-incident hardening to close root-cause gaps and prevent recurrence.
- Produce incident reports and metrics — including MTTR and incident breakdowns — for leadership to inform risk and staffing decisions.

Threat Intelligence Analyst

January 2026 – Present

State of North Dakota | Bismarck, ND

- Conduct intelligence-driven threat analysis and continuous monitoring for state infrastructure and enterprise systems supporting North Dakota government operations.
- Research and track indicators of compromise (IOCs), emerging threat actors, and adversary TTPs, mapping findings to MITRE ATT&CK to prioritize detection and defense.
- Enrich incident investigations with threat intelligence context and produce reporting that speeds up response decisions across teams.

KEY PROJECTS & ACHIEVEMENTS

- **Homemade Pentesting Machine (BlackArch):** Built and maintain a dedicated BlackArch penetration-testing workstation with encrypted storage and automated tool pipelines, used for red-team practice and CTF competitions.
- **National Cyber League (NCL) — Spring 2026:** Team: Top 15 nationally. Individual: Top 750 of 8,000+ competitors. Focus areas: exploitation, forensics, cryptography, traffic analysis, reverse engineering.
- **Threat Hunting Playbook Development:** Authored a modular threat-hunting playbook aligned to MITRE ATT&CK and built Splunk dashboards to detect suspicious PowerShell activity, anomalous logins, and beaconing.

EDUCATION

- **Bachelor of Applied Science, Cybersecurity and Information Technology** — Bismarck State College, Bismarck, ND (Conferred May 2026)
- **Associate in Applied Science, Cybersecurity & Computer Networks** — Bismarck State College, Bismarck, ND (Conferred May 2025)

Relevant Coursework: Penetration Testing Fundamentals, Ethical Hacking & Network Defense, Digital Forensics Fundamentals, Mobile Forensics Fundamentals, Cybersecurity Operations, Cybersecurity Prevention & Countermeasures, Disaster Recovery & Incident Response, Emerging Threats & Defenses, Database & Web Application Security, Cloud Computing Fundamentals, Implementing MS Windows Active Directory Infrastructure, Linux Network & Security Administration, Computer & Network Security, Cyber Ethics.

ADDITIONAL INFORMATION

- **Community:** Cyber defense club participant; mentor for NCL/CTF team members.
- **Availability:** Open to SOC Analyst, Incident Responder, Threat Hunter, or Threat Intelligence Analyst roles (onsite, hybrid, or remote).
